

Discover, Connect & Interact

University life is not just about studying; it's about growing together with your peers. Alongside peers, students navigate new experiences, share diverse perspectives, and forge lasting friendships.

UniVibe

Take proactive steps to open new social doors on campus.

The Ultimate Social App for the University Of Melbourne Student

Our app opens new social doors on campus, making it easy to connect with study partners, organize group activities, or quickly meet up with friends. Whatever your goal, we help you enjoy every meaningful moment on campus.

Key Features

1. Shake To Connect

Utilizing an accelerometer sensor, **UniVibe** detects when users shake their phones and suggests nearby students who share similar interests, making it easier to build your campus network.

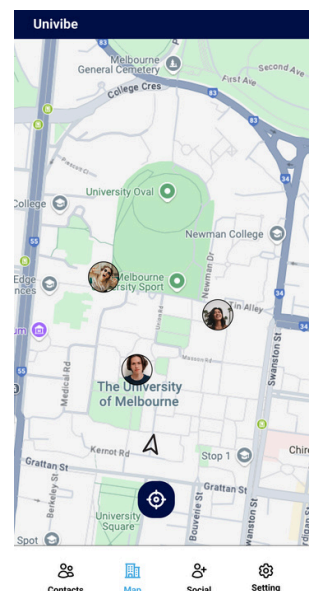

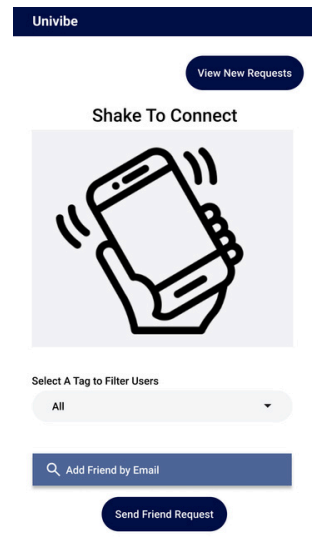

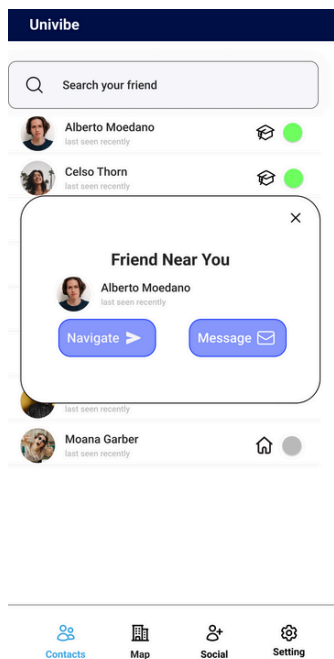

2. Smart Friend Alerts

UniVibe automatically calculates the distance between you and your friends based on the data from your GPS sensor. It pushes notifications when your friends are nearby. Invite them for coffee or group study.

3. Unimelb Map

UniVibe has a real-time map showing where your friends are on campus, making it easy to meet up for class, or socializing. It utilised the GPS to get the precise location of users; and uses the Compass to indicate the direction users are facing to help them find the way to meet their friends, also uses the light sensor to switch the light/dark mode automatically to avoid the screen light burn your eyes in the dark.

UniVibe fully respect your privacy. You decide when and how your location is shared, making sure your feel comfortable and protected.

Effortlessly connect and enjoy every moment of your campus life.
